🚀 Why This Mission is Important

- Demonstrates SpaceX's progress toward deep-space missions.
- Validates the "in-space reflight" capability of Raptor engines.
- Sets the stage for future "lunar and Mars missions".

📺 Watch: SpaceX Starship Flight Test 7

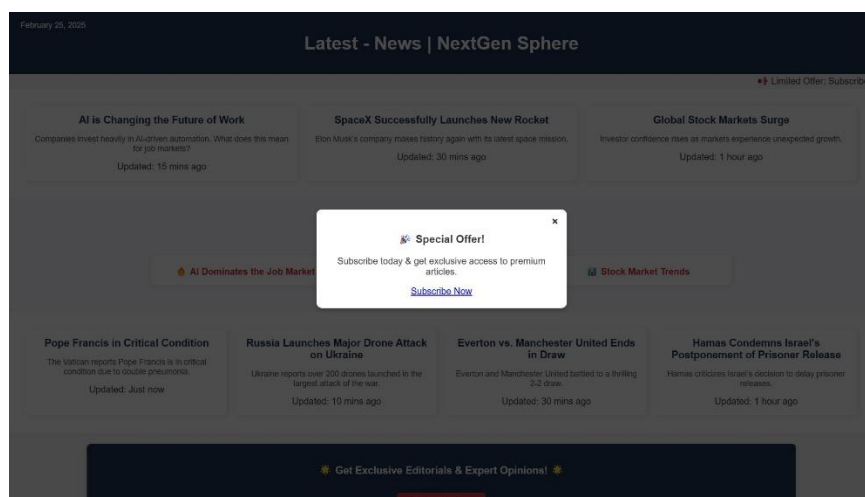

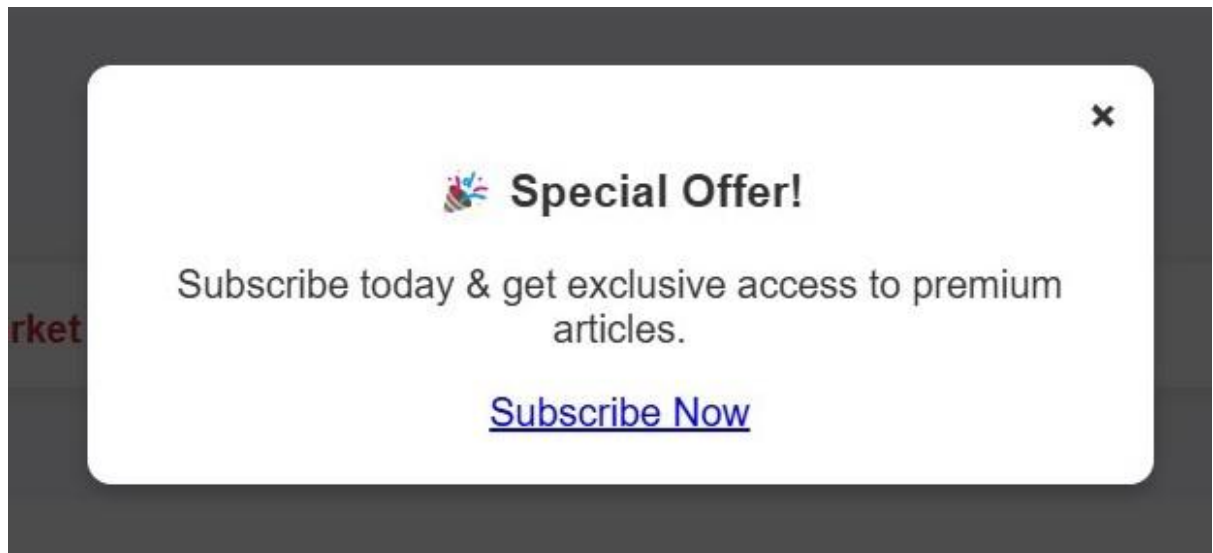

The biggest and most powerful rocket ever built took to the skies again. And this time, it came back. SpaceX launched its 400-foot-tall (122 meters) Starship vehicle for the fifth time ever today (Oct. 13), sending the giant rocket aloft from its Starbase site in South Texas at 8:25 a.m. EDT (12:25 GMT; 7:25 a.m. local Texas time). The mission aimed to break new ground for Starship, and for spaceflight in general: SpaceX planned to return Starship's huge first-stage booster, known as Super Heavy, directly to its launch mount, catching it with the "chopstick" arms of the launch tower in a bold and unprecedented maneuver.
